

**NASA Armstrong Flight Research Center (AFRC) Engineering and Technical Support Services (ETSS) contract, Edwards, CA**

STC provides support to New Horizon Aeronautics' (NHAero) ETSS contract at the NASA Armstrong Flight Research Center (AFRC) in Edwards, CA. ETSS is an eight-year, multi-award IDIQ contract with a maximum value of \$264M, which delivers engineering expertise for research, flight and mission operations; engineering support for facilities and safety/mission assurance; and support for various technical functions including project planning and control, range support, lab support, and special studies. STC leverages subject matter expertise across multiple technical disciplines with a focus on providing flight operations meteorology and engineering design support to enable realization of NASA's astrophysics and earth science objectives.
